SUMMARY

I'm a medical graduate by training, with an Msc. in Public Health, but most of my working life has actually been spent on the education and operations side of Yayasan ADDIN Perak — keeping schools supplied, making sure zakat reaches the people who need it, and helping the public understand what is being offered in Yayasan ADDIN's schools. Alongside that, teaching Tahsin and Tadabbur Al-Quran has stayed a constant for me since 2018, across a few different masjids and communities in Perak. I'd describe myself as someone who's equally comfortable with data and spreadsheets as I am trained to work with tools like IBM SPSS, Google Sheets, Google Data Studio and others. I'm also a frequent user and avid learner of artificial intelligence (AI) tools, especially Claude, ChatGPT and Gemini.

PERSONAL DETAILS

I/C No.	900106-08-5377	Age	36 years old
